

Programming Apartment Destination Numbers - GSM Intercom System

To program numbers, a handset will need to be plugged into each dialplan module (grey modules) found in the control panel boxes.

- Step 1. Either pickup local handset, you should hear a dialtone.
- Step 2. Press #0* to go into programming mode (you should hear a 'bip')
- Step 3. Press 02 to go into dialplan programming
- Step 4. Press 01 to program unit 1 (or 02 for unit 2, etc)
- Step 5. Input 9#2 then the mobile number, and press ##
- Step 6. press ## again to exit programming and hangup
